

## Earth Sciences Conference Travel Grant

### 2024/25 academic year

The Earth Sciences Conference Travel Grant provides St. George-based graduate students with funding to support travel to attend and present research results at academic conferences. Students based at UTM or UTSC should apply for funding from those campuses.

#### Student Eligibility

The travel grant is open to all research stream PhD and selected Master's students who are affiliated with the St. George campus of the University of Toronto and are supervised by a St. George faculty member. Applications from Master's students will be reviewed by the Associate Chair, Graduate based on the application and a letter from the supervisor.

Eligible students must satisfy the following departmental requirement:

- attend at least eight seminars/colloquium series per year, four of which must be at the Earth Sciences Department (including Rockfest)

#### Grant Purpose & Timing

Travel grants are provided to fund graduate student travel to attend and present at scientific conferences. Other research travel purposes, such as off-site data collection, collaboration or courses, are not eligible purposes.

The granting year runs from September 1, 2024 to August 31, 2025. Grants will reimburse students who have paid for or attended a conference in this time period. For example, reimbursement can be sought for a conference paid for before August 31, 2025, but is scheduled to take place after August 31, 2025. Students may be awarded more than one travel grant up to a combined maximum of \$1,000 annually. Supervisors are expected to contribute funds to cover the expenses.

#### Application Process & Deadlines

The **Conference Travel Grant Application Form** must be completed and a copy of the student's one-page conference abstract or details of the school/workshop attached. **The conference/workshop MUST be relevant to your current degree program as well as bring scientific value to your research studies.** The form must be signed by both the student and the supervisor before being submitted to Scott Moore. Results of the application will be sent via e-mail to the student.

All applications should be submitted **at least 1 month in advance** of the intended travel. Travel must be completed within six (6) months of the submission. Students travelling outside of Canada must register with the Safety Abroad Office (<https://learningabroad.utoronto.ca/safety-abroad/students>). Students must provide proof of Safety Abroad registration before payment of their award. Students may also apply for the SGS Travel Grant (<https://www.sgs.utoronto.ca/awards/sgs-research-travel-grant>).

### **Adjudication**

Travel grant requests are subject to the Associate Chair, Graduate's approval for PhD students and the Graduate Affairs Committee's approval for master's students. Travel grant requests will be awarded to all eligible applications if the allotted funding for the granting year has not been exhausted. If the total sum of grant requests exceeds the allowable funding, priority will be given to:

1. Applicants who have not received Earth Sciences travel grants in previous years;
2. Applicants who are close to the end of their degrees;
3. Applicants who have obtained external travel support (SGS Travel Grant, conference organizer, etc.)

### **Expense Eligibility & Reimbursement**

Eligible expenses include conference registration, and accommodation and transportation if the conference is being held in person. These expenses require submission of receipts/proof of payment. A per diem reimbursement of \$80/day in Canada or \$100/day outside of Canada may be claimed for meals when travelling. The grant will be paid once all receipts have been submitted.

# Earth Sciences Conference Travel Grant Application

Return the completed and signed form and the one-page attachment to Scott Moore prior to travel.

Name:

Student Number:

Email Address:

Supervisor:

Program:

Program Year:
